### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 09 July 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### **Detailed Action**

#### **Drawings**

The drawings have been approved by an official draftsman.

#### **Objection to the Disclosure**

##### **37 CFR 1.163**

The following is a quotation of section (a) of 37 CFR 1.163:

(a) The specification must contain as full and complete a disclosure as possible of the plant and the characteristics thereof that distinguish the same over related known varieties, and its antecedents, and must particularly point out where and in what manner the variety of plant has been asexually reproduced. In the case of a newly found plant, the specification must particularly point out the location and character of the area where the plant was discovered.

##### **35 USC § 112**

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

As specific to United States Plant Patent applications, the specifics of 37 CFR 1.164 (reproduced below) are controlling:

The claim shall be in formal terms to the new and distinct variety of the specified plant as described and illustrated, and may also recite the principal distinguishing characteristics. More than one claim is not permitted.

In plant applications filed under 35 U.S.C. 161, the requirements of 35 U.S.C. are limited. The following is a quotation of 35 U.S.C. 162:

No plant patent shall be declared invalid for noncompliance with section 112 of this title if the description is as complete as is reasonably possible. The claim in the specification shall be in formal terms to the plant shown and described.

The disclosure is objected to under 37 CFR 1.163 (a) and under 35 U.S.C. 112, first paragraph, because the specification presents less than a full, clear and complete botanical description of the plant and the characteristics which define same per se and which distinguish the plant from related known cultivars and antecedents.

More specifically:

A. Applicant is requested to indicate whether the parent cultivar 'Heritage' has been patented in the United States, is currently the subject of pending U.S. plant patents application, or not patented. If patented, --(U.S. Plant Patent No.)-- should be inserted after the appropriate cultivar name. If subject of a pending application, such should be referred to by serial number. If not patented, --(not patented)-- should be inserted after the appropriate cultivar name.

Art Unit: 1661

B. Applicant should be more descriptive with the comparison between the parents ‘PS-127’ and ‘Heritage’ and the observed plant, ‘PS-1764’ in how it differs from each other.

C. On page 2, line 4, Applicant should disclose the plant patent number, U.S.P.P. 10,142, for the cultivar PS-1049. Correction is needed.

D. Applicant should set forth in the specification the time it takes to initiate root development of the observed plant.

E. Applicant should disclose the flower diameter in the specification.

F. On page 12, line 26, the term “medium” is not an appropriate descriptive term describing the texture of the petiole. Applicant should utilize a more suitable term such as --pubescent-- or --smooth--, for example. Correction is needed.

G. Applicant should set forth in the specification whether there are reproductive organs or not. If so, Applicant should disclose such information and describe these structures (i.e. amount, sizes, colors) in the interest of providing as complete a botanical description of the observed plant as is reasonably possible.

H. Applicant should disclose information to the observed plant’s winter hardiness and drought/heat tolerance.

I. The claim in this case is improper. The claim must be to the instant plant as illustrated and described. An acceptable claim would be, “A new and distinct raspberry **plant** as herein described and illustrated.” (emphasis added). Should Applicant desire, the present descriptive language could also remain in the claim.

The above listing may not be complete. Applicant should carefully review the disclosure and import into same any corrected or additional information which would aid in botanically identifying and/or distinguishing the cultivar for which United States Plant Patent protection is sought.

#### Claim Rejection

35 U.S.C. § 112, 1st and 2nd Paragraphs

Claim 1 is rejected under 35 U.S.C. 112, first and second paragraphs as not being supported by a clear and complete botanical description of the plant for reasons set forth in the Objection to the Disclosure Section above.
